

## VizTrack Dual View Dash Cam

### Quick Start Guide

Thank you for purchasing the VizTrack Dual View Dash Cam from BrickHouse GPS!

#### Installation

##### 2 Cleaning

Clean the area on the windshield.

##### 3 Place Windshield Mount

Peel off the protective membrane of the 3M adhesive sticker and stick the Windshield Mount to the front windshield inside the vehicle.

##### 4 Install Dash Cam

Install the Dash Cam to the bracket, then insert the long-screw, make a roughly adjustment first.

**Attention:** Dash Cam should be located in or near the middle of the front windshield, and be careful not to block the driver's view. If ADAS function is activated, don't secure it too tightly.

##### 5 Install DMS Camera (Optional)

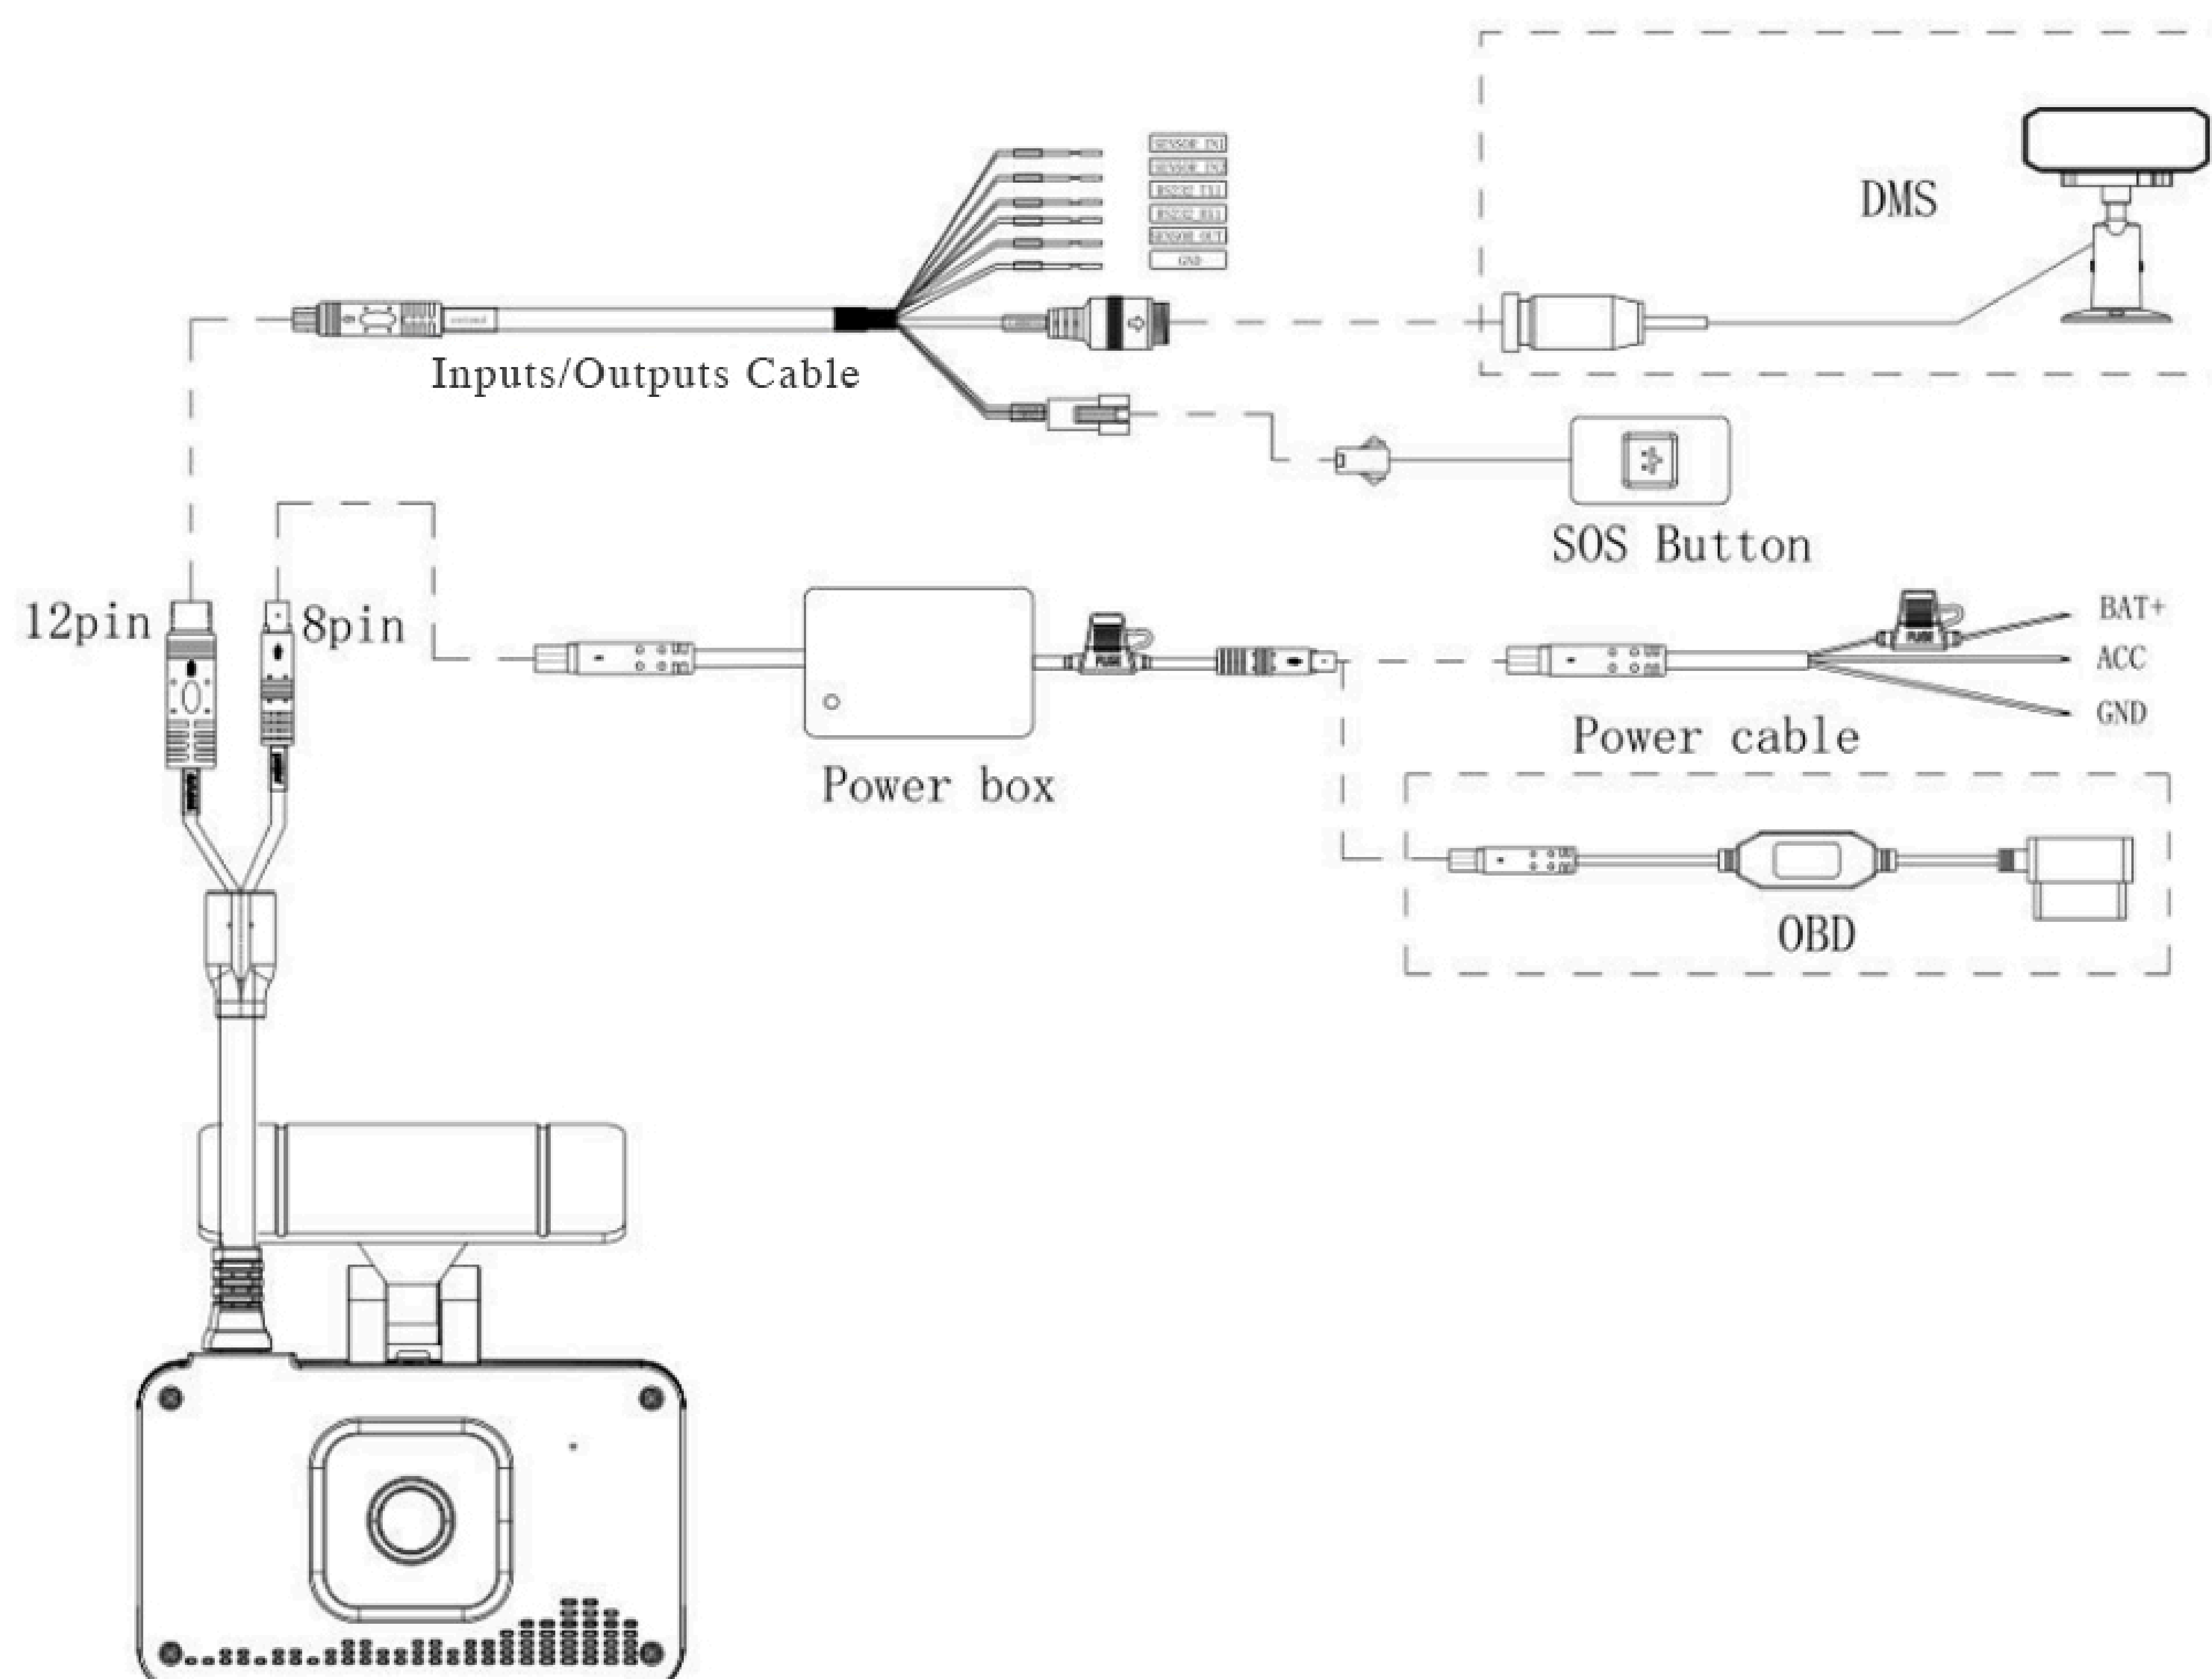

If project required, install the external DMS camera

##### 6 Power

Connect the Dash Cam to power (There are two ways to connect power, one is to use OBD; the other is to use VCC,ACC and GND cable).

##### 7 Readjust

After device is turned on, if you need readjust angle or ADAS calibration, check the camera view via "Howen-iTool". Then tighten the long-screw when finished.
